- Teamwork.
- Flexibility and adaptation.
- Proactivity.
- Assertiveness.

Rubén Palomo Fontán

I am a Junior Software Developer looking for a job where I can grow professionally and learn.
I have worked with C#, but I also study and program in other programming languages, especially Python and Javascript.
Coding is not all that I'm studying. I'm working self-taught and in academia to obtain the Cambridge C1 certificate in english.

IT Professional Experience

Software developer - VT-Lab (June 2022 - August 2022).

- Development of VR and AR applications with C#.
- Version control with GitHub.
- JSON file management.
- Documentation writing with Markdown.
- The last feature I worked on was creating a script that transcribed voice orders using VoiceFlow and executed them.

IT Projects

Bot creation and management - Self-taught (Since 2021).

- Development of automatic response programs (bots) for Telegram and its management on the server.
- Creation of several games, administration programs, etc.
- NodeJs and Python. Oracle server.

Library for C – 42 Madrid (June 2022 – August 2022).

- Creation of several projects with the international school of programming 42.
- The last project that I carried out was the creation of a library with numerous functions in C.
